This dictionary has been compiled to meet a need expressed by teachers currently using Bliss Symbols in their instructional program. It is by no means to be considered a complete or comprehensive dictionary of Bliss Symbols but only as a provisional one designed as a temporary stop-gap measure until a formal version is compiled and published.

The symbols have been hand-drawn and are not to be used as a reference for the component parts of symbols or as a guide to the drawing of the symbols.

This provisional dictionary was compiled by Mr. Oliver Mott in 1974 to accompany the 1974 symbol vocabularies.

To up-date symbols which have been revised, stamps appear on the back inside cover. Please refer to these stamps whenever a symbol in the body of the dictionary is marked "See Stamp".

APR

1976

PREFACE TO THE DICTIONARY

The symbols used in the Symbol Communication Research Project Vocabularies are of four types:

Simple pictographs depicting concrete terms, e.g.  House.

 animal.

Arbitrary symbols (with no representational connection between symbol and concept), e.g. ? question, / the, + and.

Abstract representational symbols, indicating relational concepts.
e.g. | after, | before, v on.

AND

Compound ideographs representing objects or concepts by combinations of other symbols, e.g.  late  school

(house-give-knowledge)

The purpose of this word-to-symbol dictionary is, firstly, to list all the symbols that appear (or have appeared) on the Symbol Communication Research Project displays, and secondly, to give a breakdown of the compound symbols. The composition of the compound symbols is exposed only in terms of the parts which make them up, and a more detailed explanation or interpretation of the symbol is not given. The dictionary does not necessarily show how each symbol should be explained to a child learning the system.

It may help to give an explanation for three particular symbols which occur in a number of compounds in an idiomatic sense:

 basic meaning, heart, also represents feeling, emotion, in such symbols as  happy,  angry,  upset,  feel,

 to love,  to want.

 basic meaning, roof (cf.  house), is extended to mean protection, safety (as in  shoes,  safe,  policeman). and is also the element indicating family relationships: e.g.  Father

* 1974

PREFACE CONT'D.

family.

brother, etc., and

to marry.

basic meaning earth, occurs with eye in colour with ear
 in sound, loud, with mouth in food, and with plus
 in to have.

KEY TO DICTIONARY:

The first seven columns indicate in which vocabularies the symbol appears:

B 1 3 1 2 4 5

() contains a symbol for this concept but is quite different from the one in use in the ~~current~~ vocabularies.

* - symbol has been modified to the one now on the current vocabularies, (the form shown in the Dictionary)

w - the wording has been altered in the current vocabularies.

B - Charles Bliss' Semantography, the source of the great majority of symbols, and of the system itself.

1 - the first 100 vocabulary in use at O.C.C.C. until summer 1973

3 - the 340 vocab., used at O.C.C.C. until Summer 1973

1 - the ~~new~~ 100, ~~currently~~ in use at O.C.C.C.

2 - the 200, " " " " "

4 - the 400, " " " " "

5 - the 512, on prototype electronic display, Sept. 1974

Next the word is given which appears beneath the symbol on the current vocabularies:

B 1 3 1 2 4 School home teach

A word which is bracketed does not occur on any of the displays, but the symbol associated with it is a basic element, as part of other compound symbols.

The symbol follows:

and finally the words indicating the composition of a compound symbol:

home teach

These refer to the symbols listed under this heading in the Dictionary.
